Technical data

The GFD is available in 5 diameters, from 20 to 200 Liters, according to the table below:

Capacity (L)	Inside diameter(mm)				
	305*	360	380	420	510*
20	300				
30	435				
40	570	420			
50		515	465		
60		615	555	460	
70		710	640	530	
80		810	730	605	
90			820	675	
100			910	745	515
110				820	565
120				890	610
130				965	675
140					710
150					760
160					810
170					855
180					905
190					955
200					1005

* Available diameters within a few months

Main advantages of the GFD

100% recyclable, all parts can be easily separated before recycling.

Without any metal parts, the GFD avoids all contamination with metal particle or fat.
The GFD provides comfort and safety for the end-user (no cutting risk anymore)

Very strong, the GFD is approved for the transport and storage of hazardous materials. It is the best answer to satisfy all the requirements of the pharmaceutical, chemical and food industries.

As a security packaging, the GFD is compatible with the main security seals systems and offers you the possibility to print tracability datas.
